Product Description

PETG is made from polyethylene terephthalate modified particles. PETG is the current mainstream 3D printing material. With its ease of printing, food safety, durability and toughness, PETG is a great choice if you want to 3D print easily.

JAMG HE PETG

High Performance

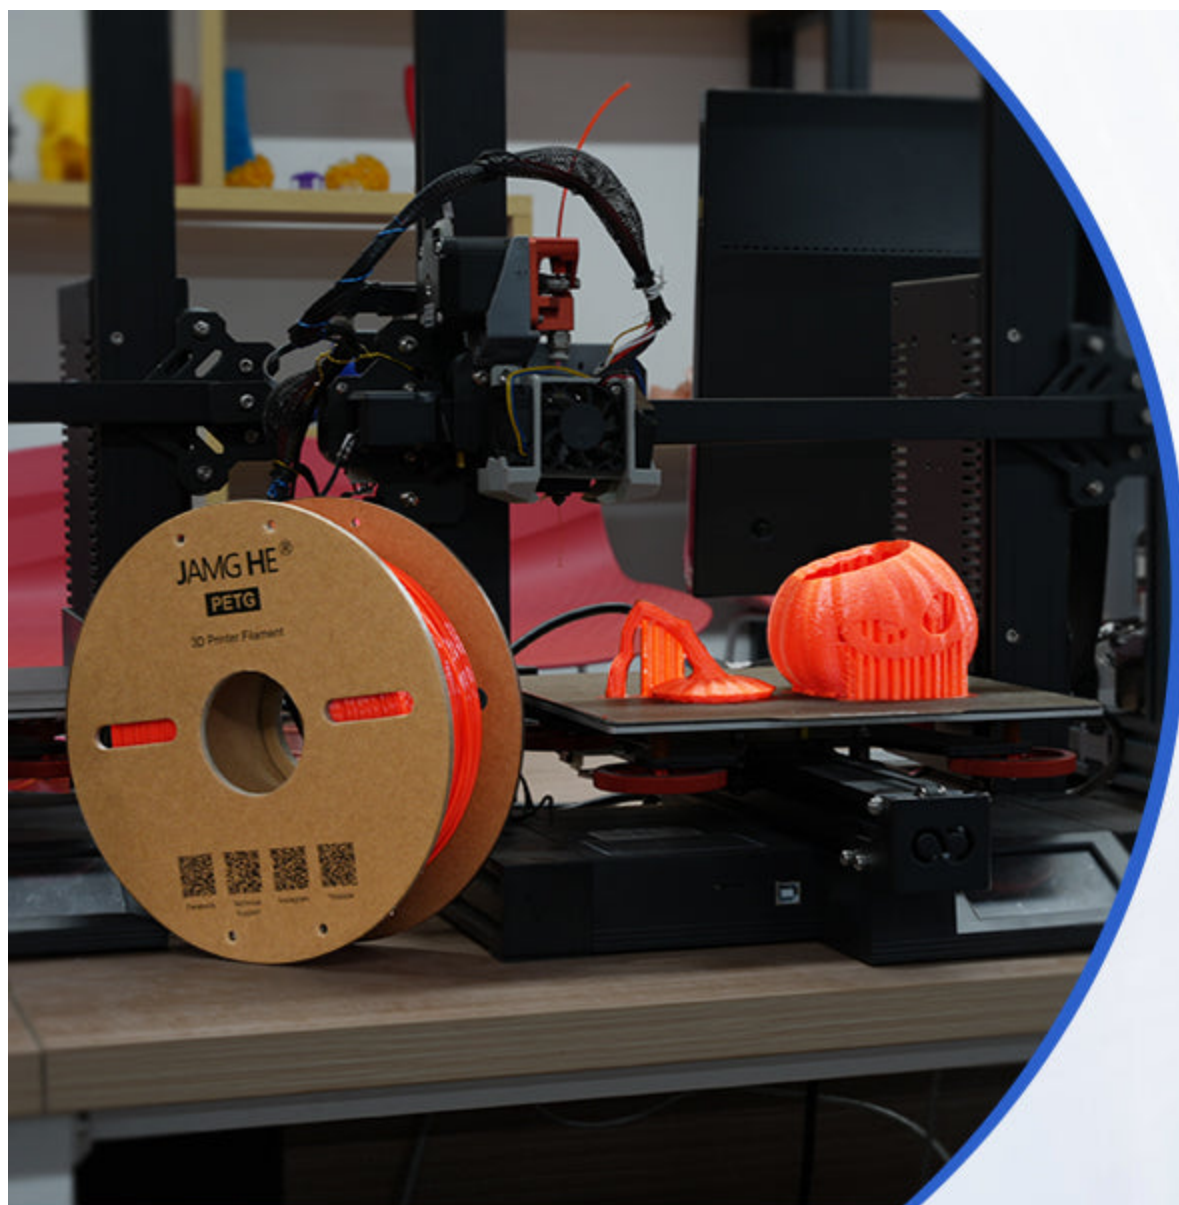

It has the advantages of both
PLA and ABS filaments

Eco-friendly, odorless, non-toxic
and high temperature resistance

No cracking and warping

Moisture resistance

Glossy and shinny prints

JAMG PETG FILAMENT

Nozzle Printing

220

50-100

Buildplate Printing

EASY TO PRINT

PETG has almost no warping and is easy to print. It also has the same strength as ABS and is suitable for printing parts or outdoor supplies.

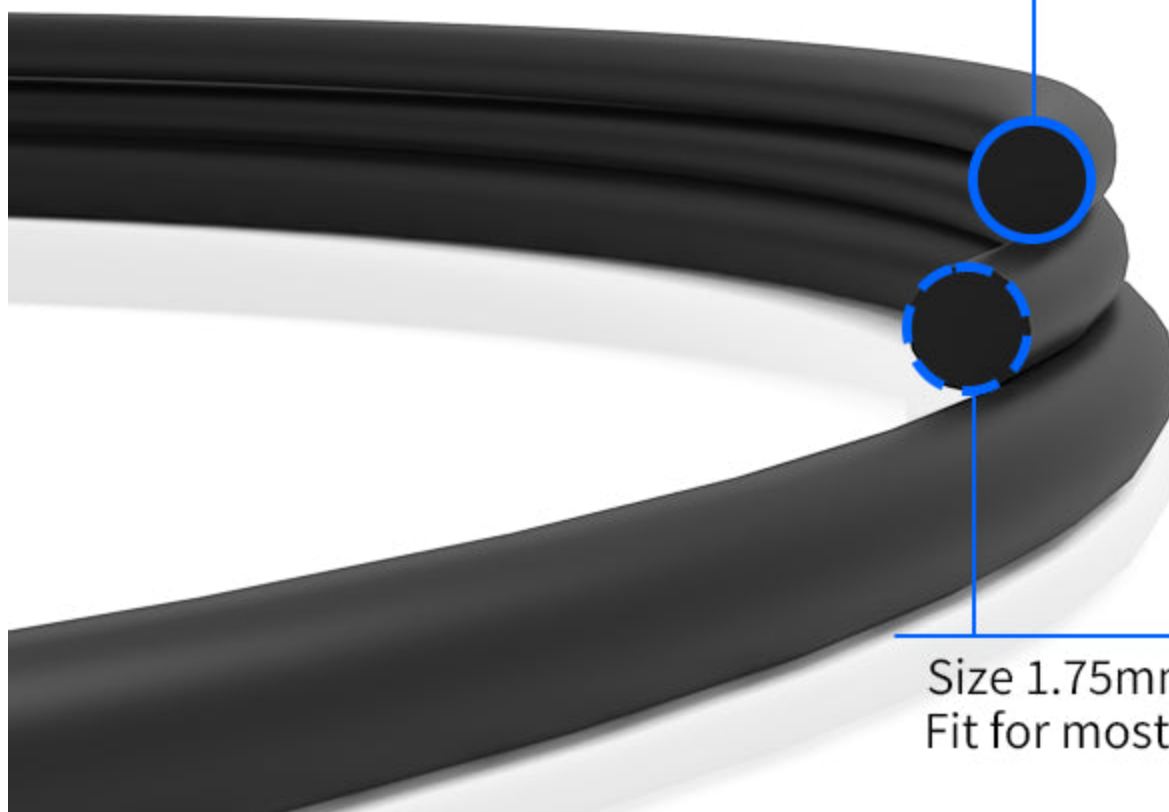

STRONG AND RELIABLE

PETG filament is stronger and offers more impact resistance than acrylic ABS and PLA filaments. It's toughness and resistance make it a dependable material for various projects.

HIGHER STRENGTH

JAMG HE PETG Filament

Solid overall and
consistent prints

Size 1.75mm ± 0.02
Fit for most 3D printers

Make Life Fun

Practical Gadgets

Home Decoration

Toy & Game

Office Supplies

FUNCTIONAL MATERIAL

PETG is a great material for applications that require more temperature resistance and toughness than ordinary PLA can provide. We have many examples of PETG being used in practical applications.
