Brand New Chamber

With Stability Enhanced

Larger print size 300*225*380mm. The fully-enclosed chamber ensures stable temperature, and quality motor avoids the model deformation.

Gorgeous Appearance and Unique Design

Full-metal pre-assembled with a blue transparent door, frosted side panels and top cover, the full-metal chamber avoids daily damage and scratches.

Higher-temp Nozzle for High-temp Filament Printing

The maximum nozzle temperature is increased from 260°C to 300°C. With high power, excellent heat dissipation and smooth extruding.

Powerful Master Chip

ATMEGA2560 master chip ensures high reliability/smooth motion/precise voltage control/effective heat dissipation.

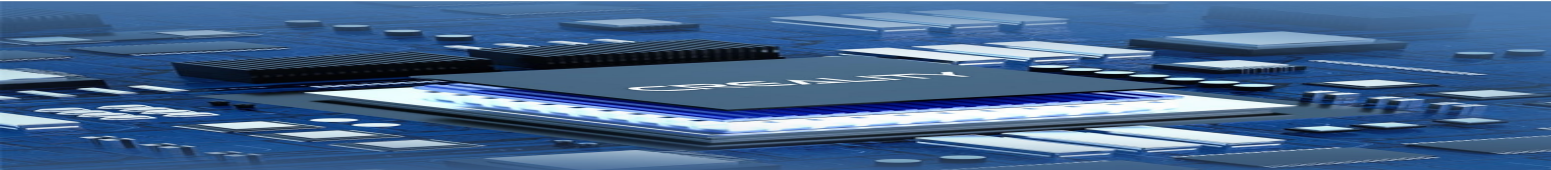

Precise voltage control

ATMEL chip

Effective heat dissipation

BLTouch Automatic Leveling

Accurate to point, simple operation, fast leveling, and more convenient printing.
