Product Description

Product information & technical details

Item no.: ESUNCN-eSilk-PLA175BR1

Manufacturer No.: eSilk-PLA175BR1

Manufacturers: eSun

Content: 1.000 g

Diameter: 1,75 mm

Product types: [PLA Filaments](#)

Filament colour: Bronze

Product Type Google Base: Filament

Net weight: 1000 g

Recommended processing temperature: 190 - 230 °C

Recommended heating temperature: 45 - 60°C

DESCRIPTION

With eSUN eSilk-PLA your model gets a glossy surface and silky-matt texture. The shiny effect of eSilk-PLA is achieved without additional polishing. The silk-look filament is best suited for art & craft projects, vases and other items that could benefit from a silky smooth look. eSilk-PLA is made of modified PLA and can be easily printed like conventional PLA. The filament also has all the other properties of normal PLA.
