Image not found or type unknown

Turntable Mode Realize 360° Rotating Scan

Complete scanning with one click, support multiple poses automatically aligned, get complete model intelligently.
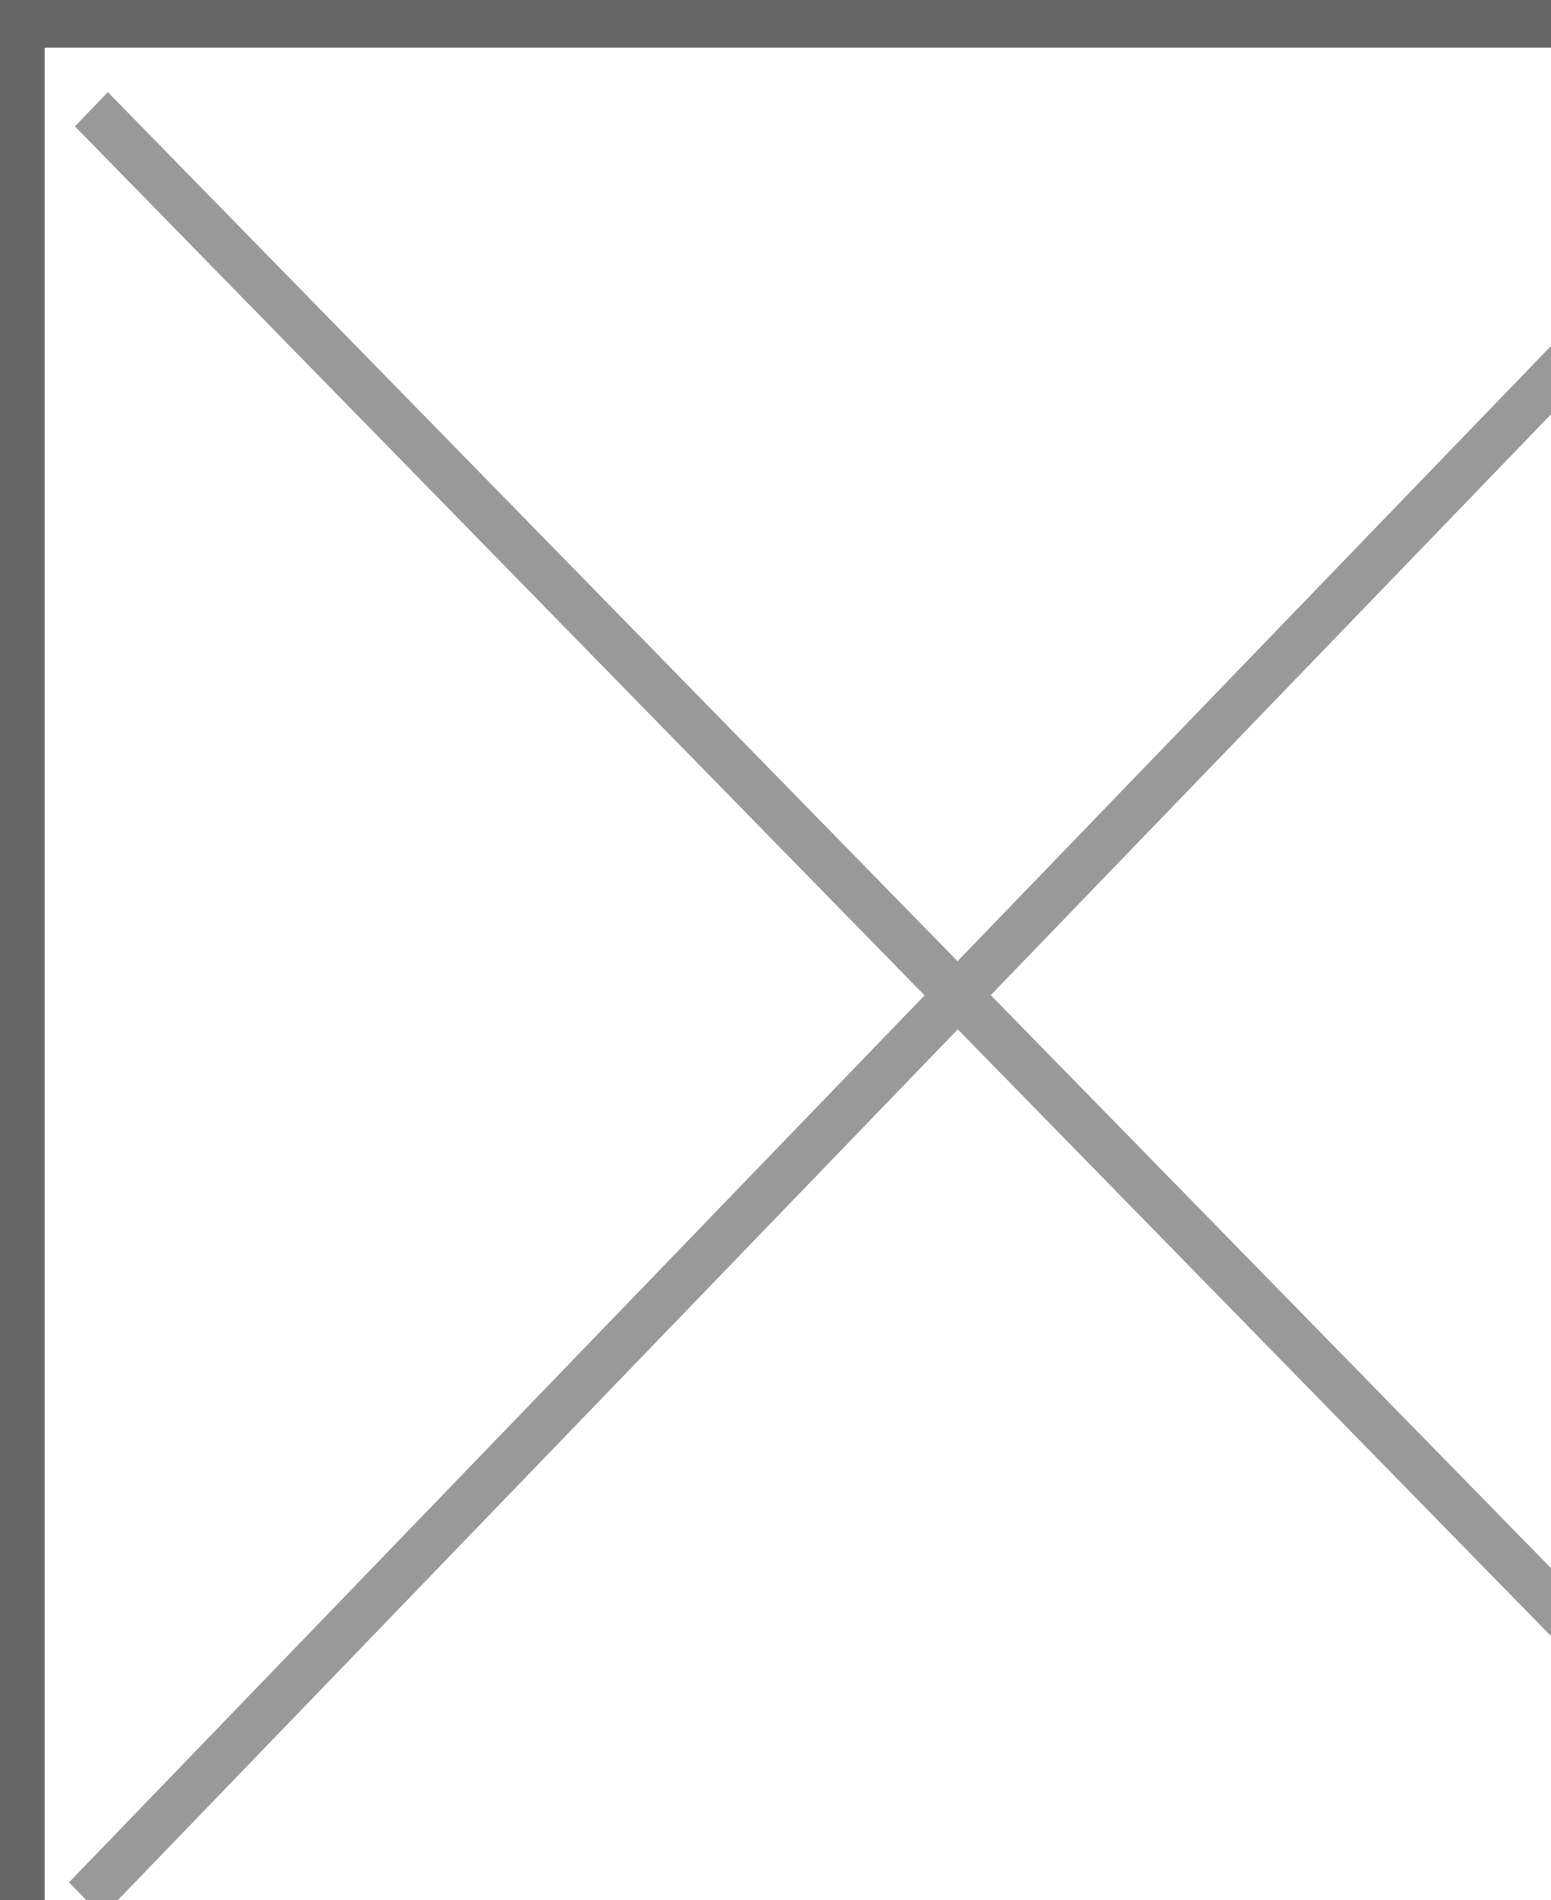

Image not found or type unknown

Handheld Mode and Turntable Mode,Flexible and Portable

Different scanning modes offer users the choice for mode switch and find out the most suitable one under various circumstances.

Image not found or type unknown

High Precison for Large Object

Scanning large objects also ensures high precision at 0.1mm.

Image not found or type unknown

High Precision of 0.1mm and Ultra Large Format

Scanning format is 1.5 times larger than traditional scanners. It ensures high precision at 0.1mm even scanning large objects.
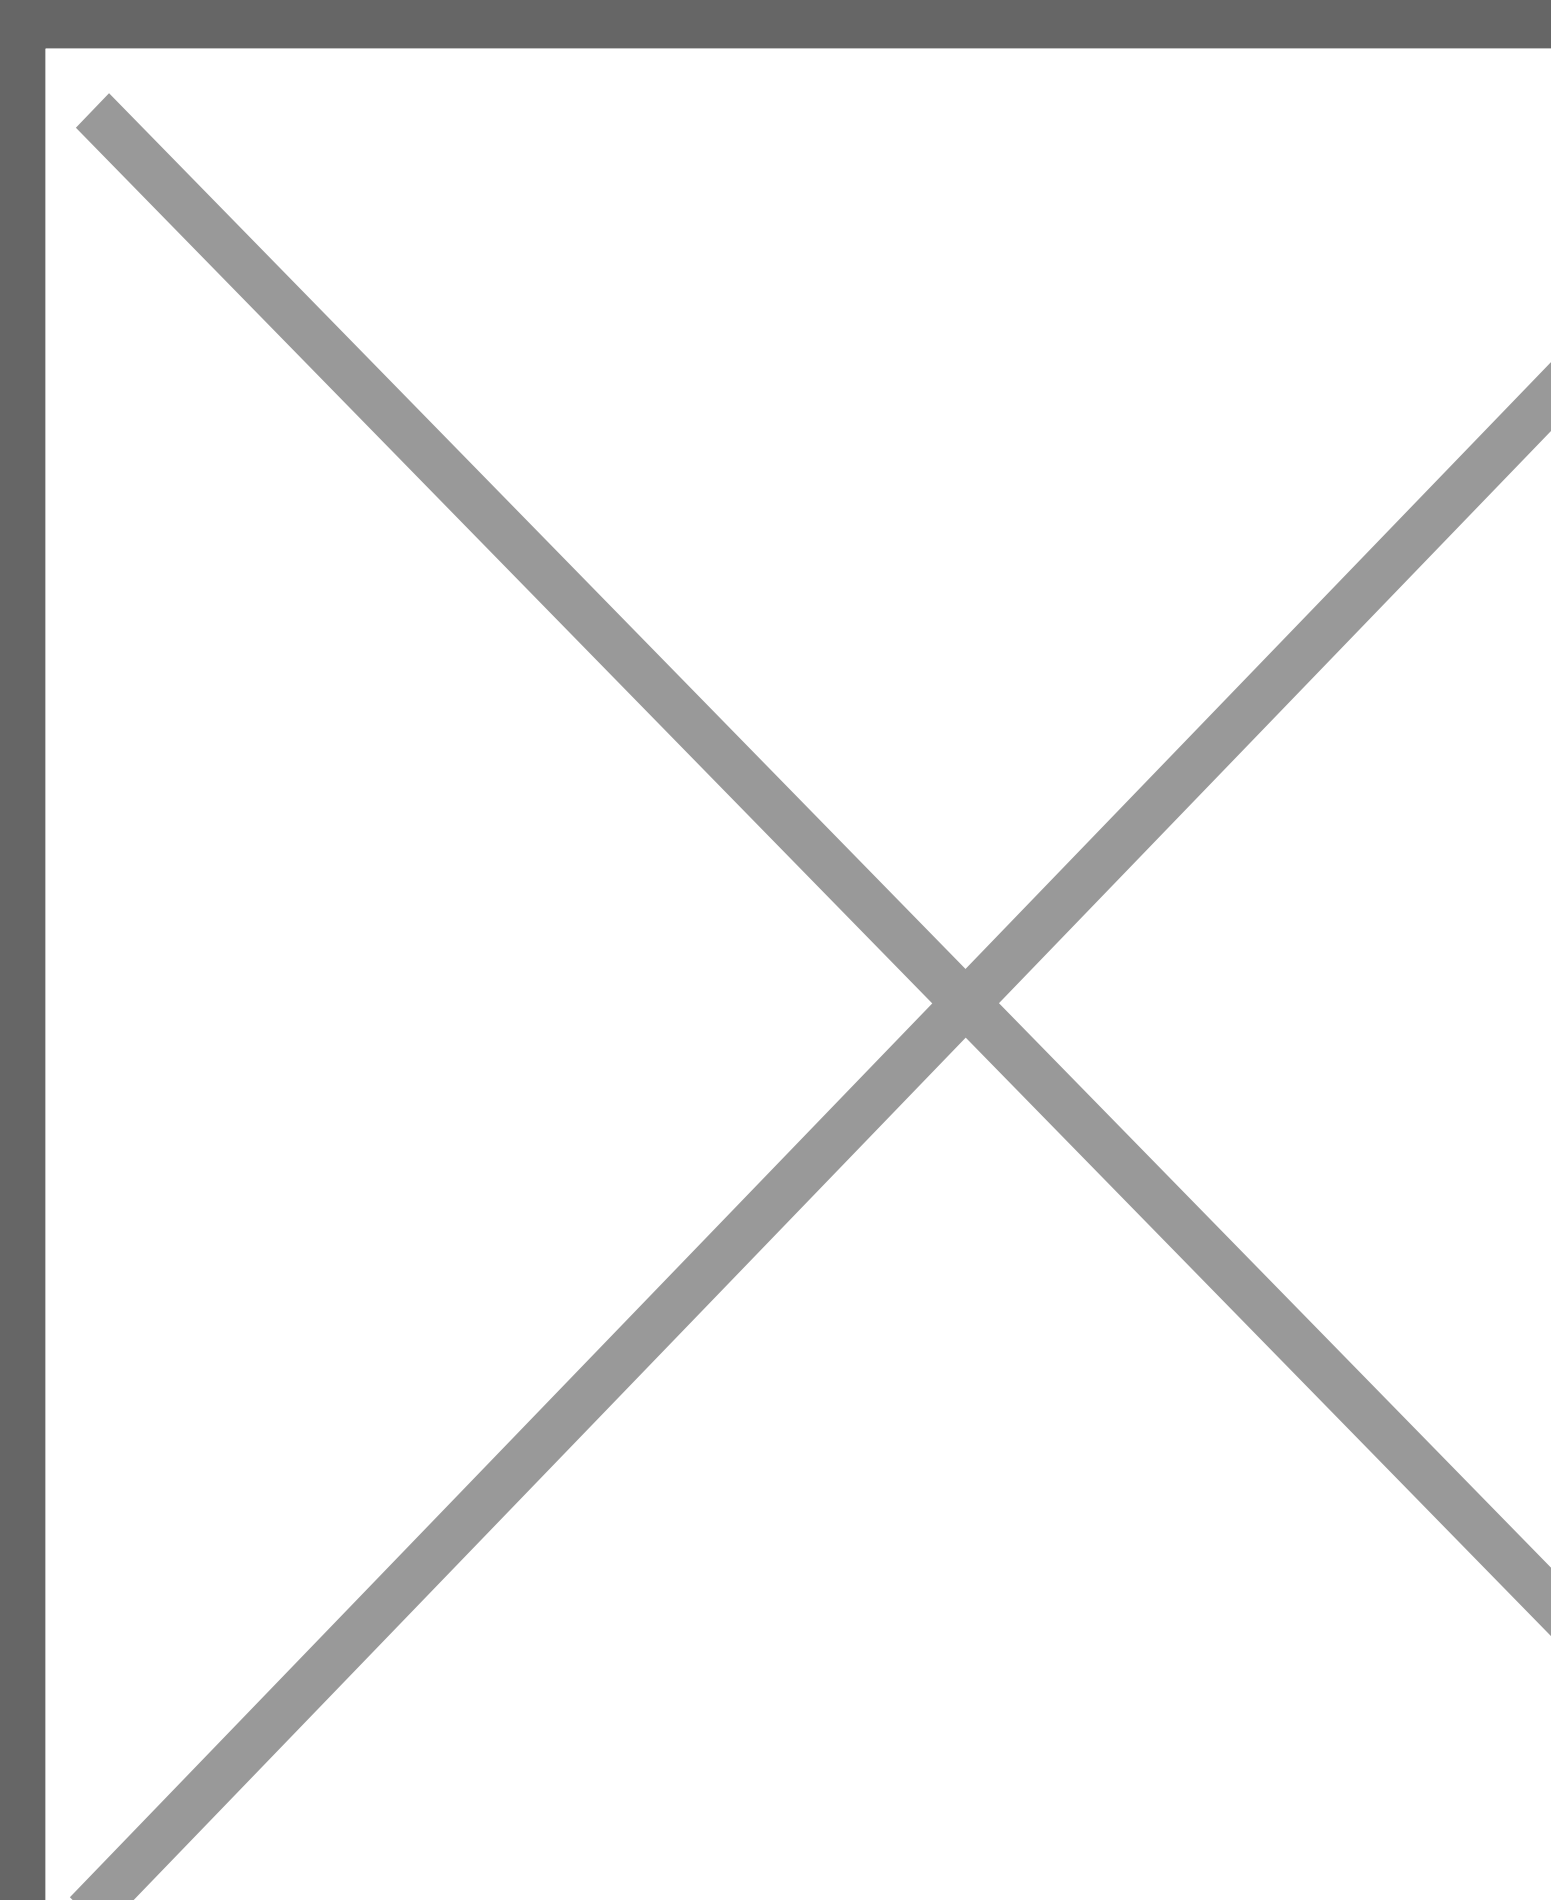

Image not found or type unknown

No Marker Scanning

Intelligent wide range alignment algorithm ensures automatic matching without marker points.
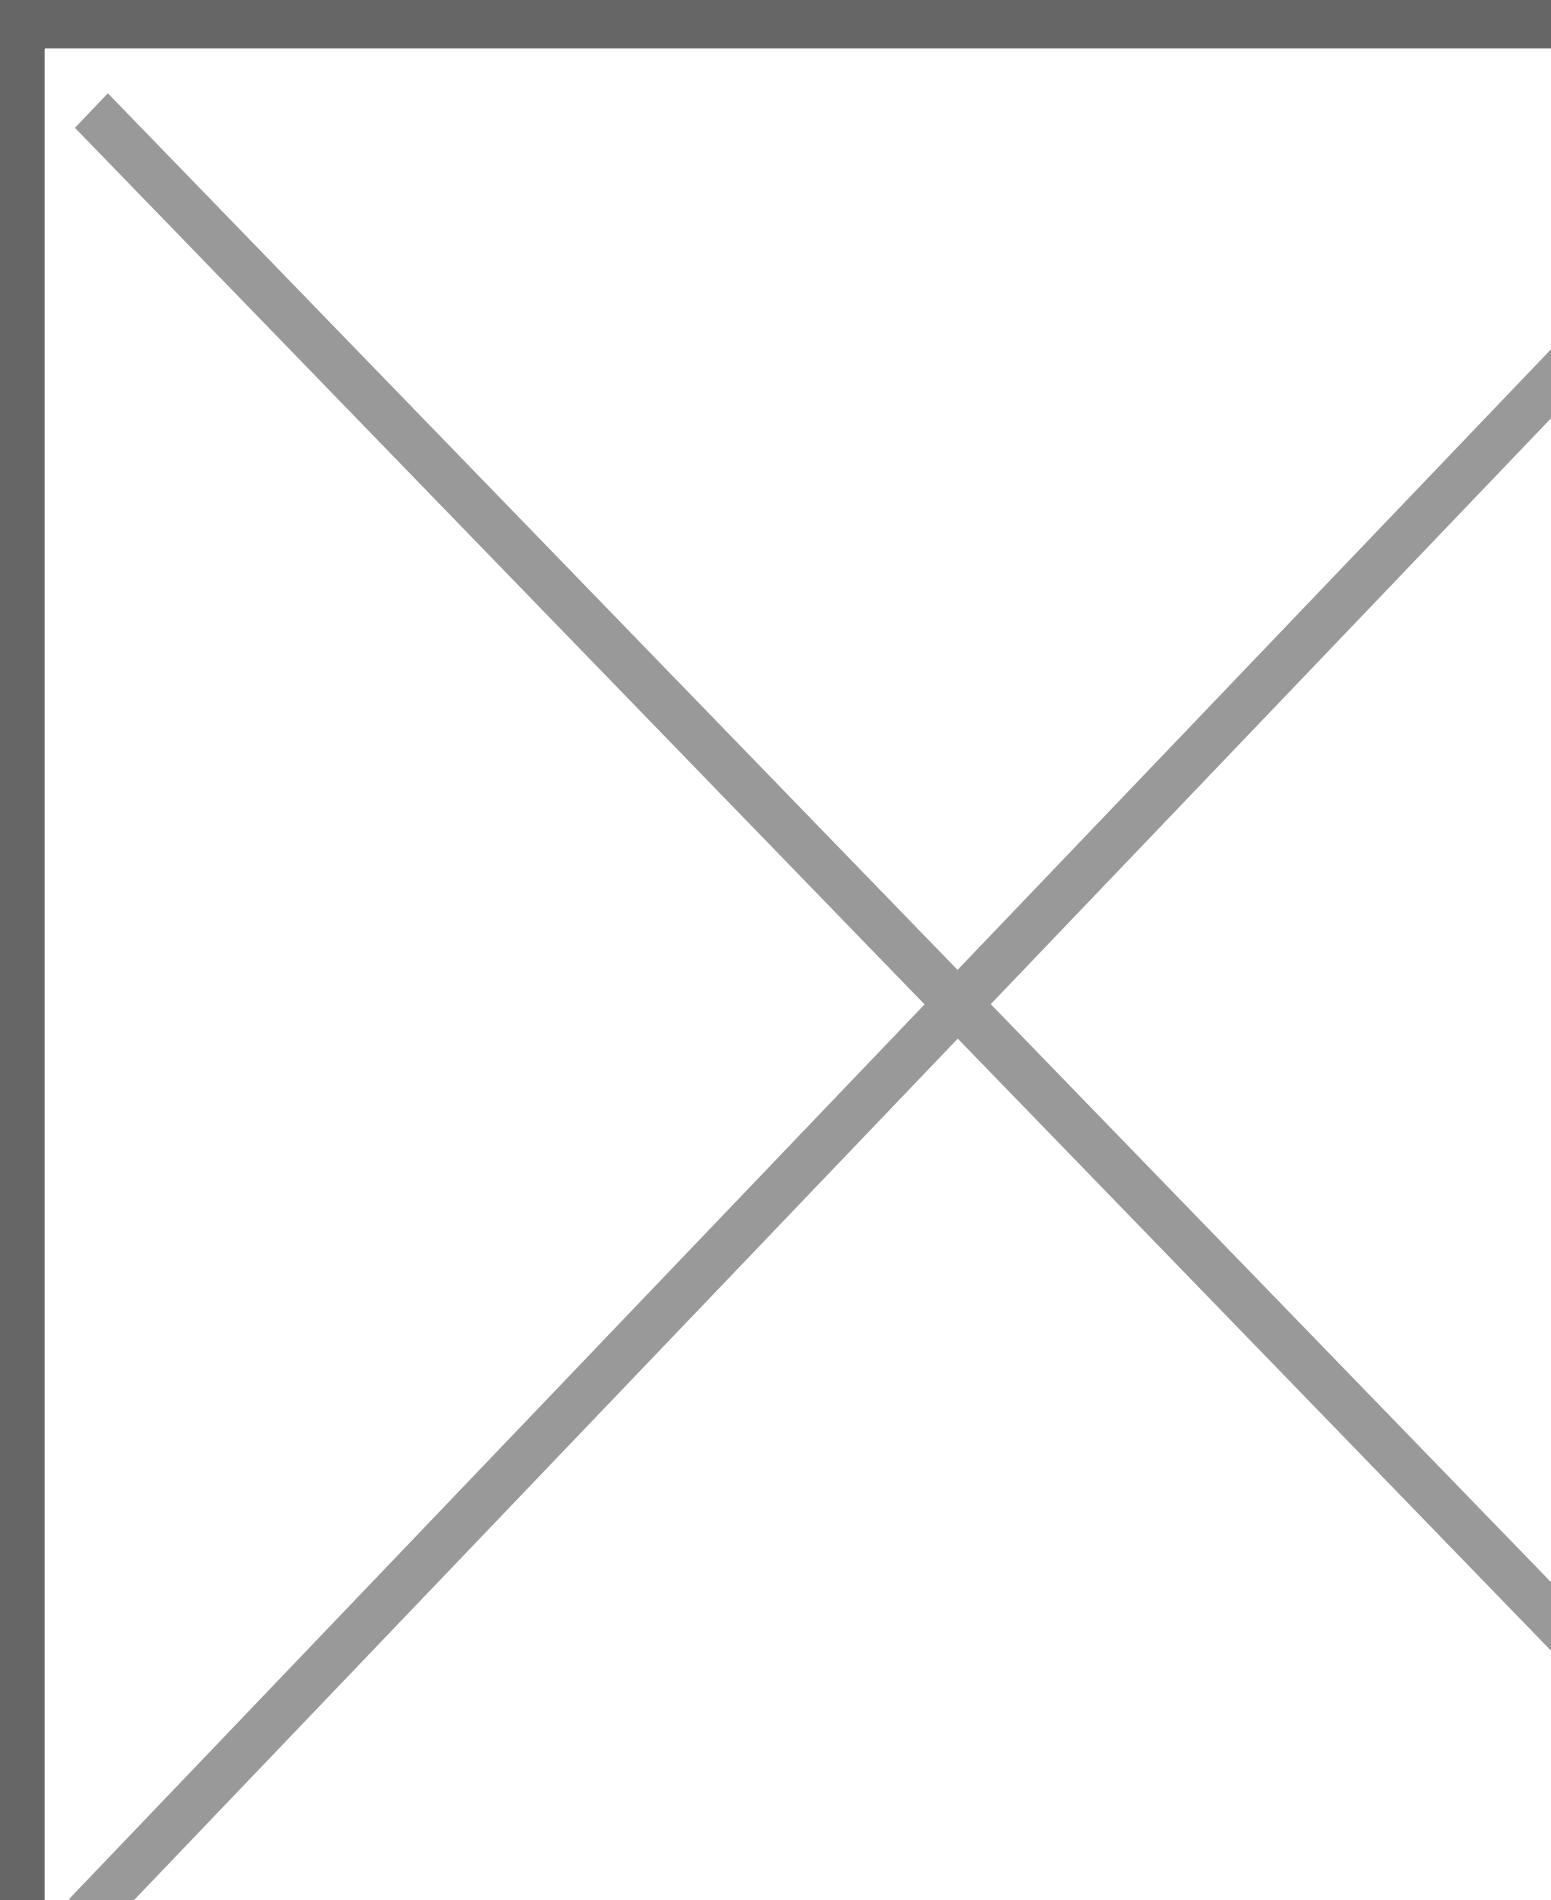

Image not found or type unknown

Automatic Multi-pose Alignment

High precision matching algorithm based on color and structural features achieves automatic composition function of multi-posture scanning.

Image not found or type unknown

True Color

24bit high-fidelity color restoration, excellent printing result.

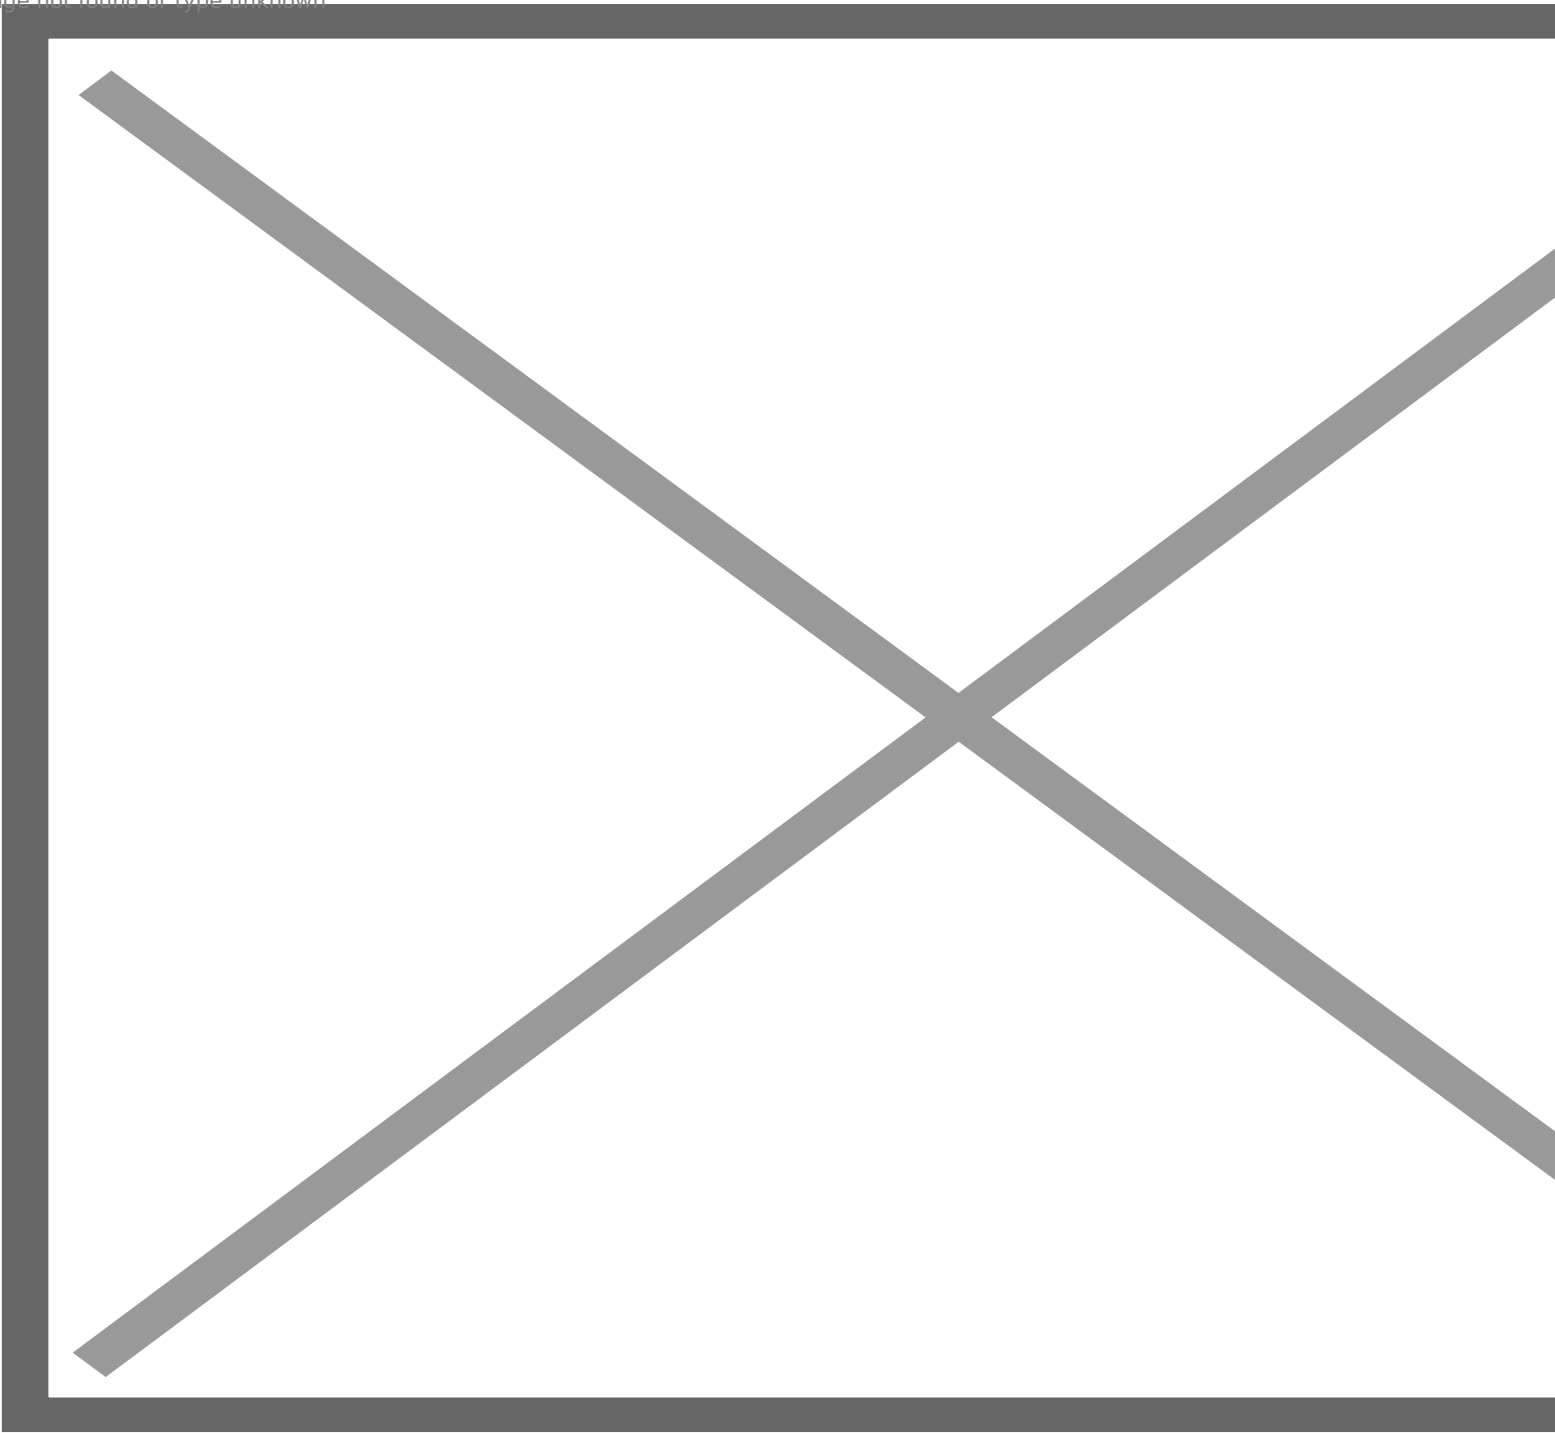

Image not found or type unknown

One-click Model Optimization

It supports multi-positional auto-alignment, auto-noise removal, auto-model simplified topology, auto-hole filling, and auto-texture mapping, impressing users with ease of use.
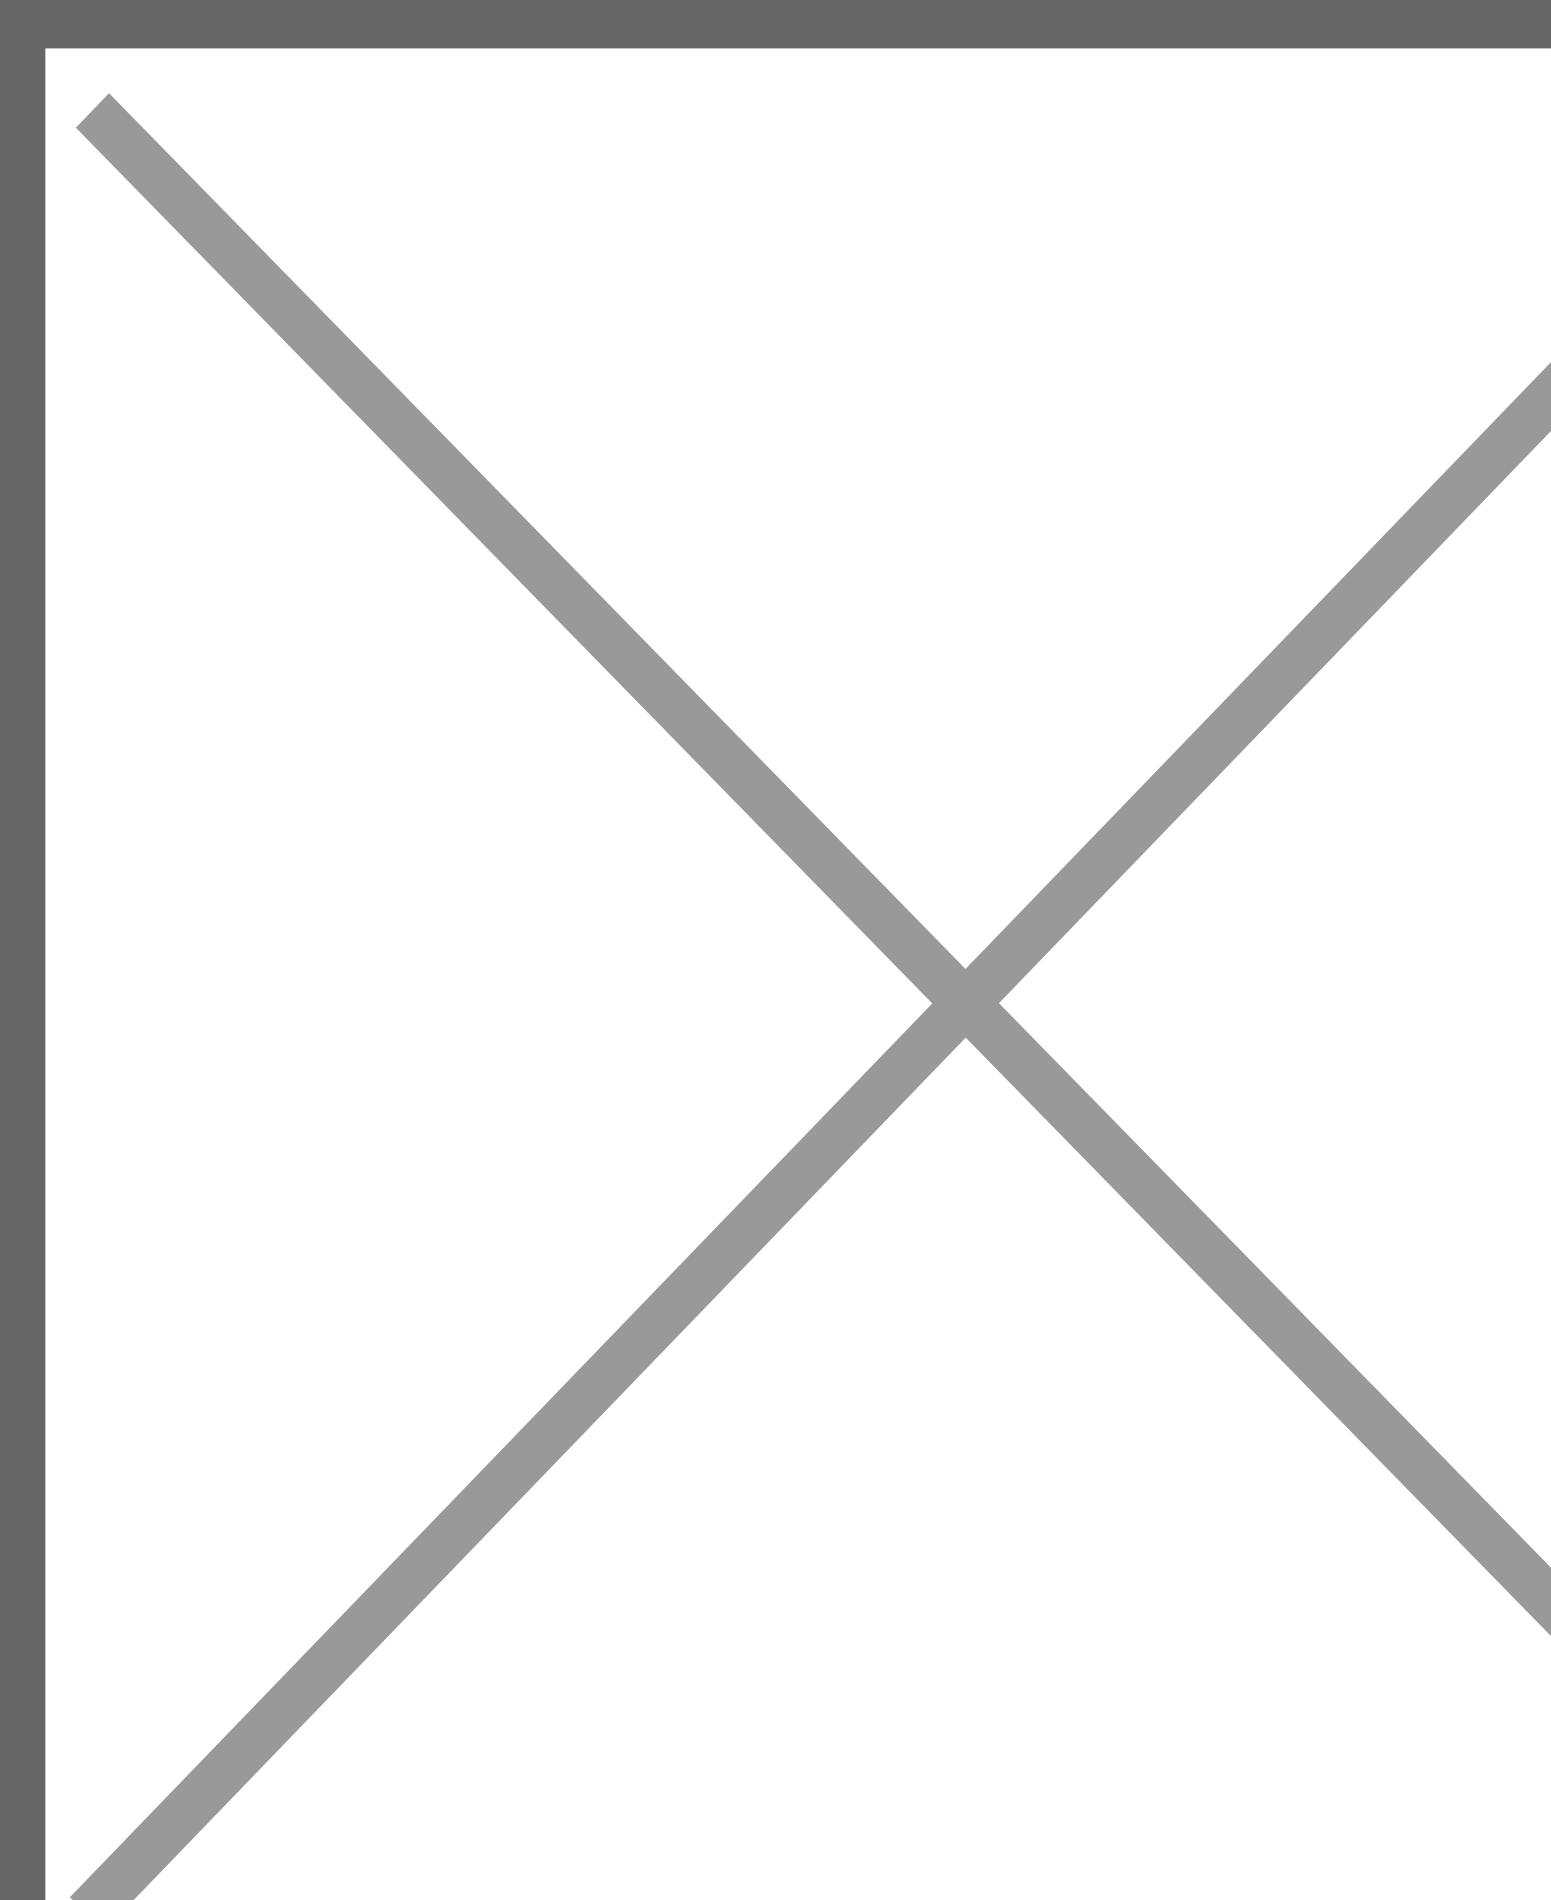

Image not found or type unknown

Challenge to Darkness

Able to perform scanning without supplemental light even in a dimmed environment.
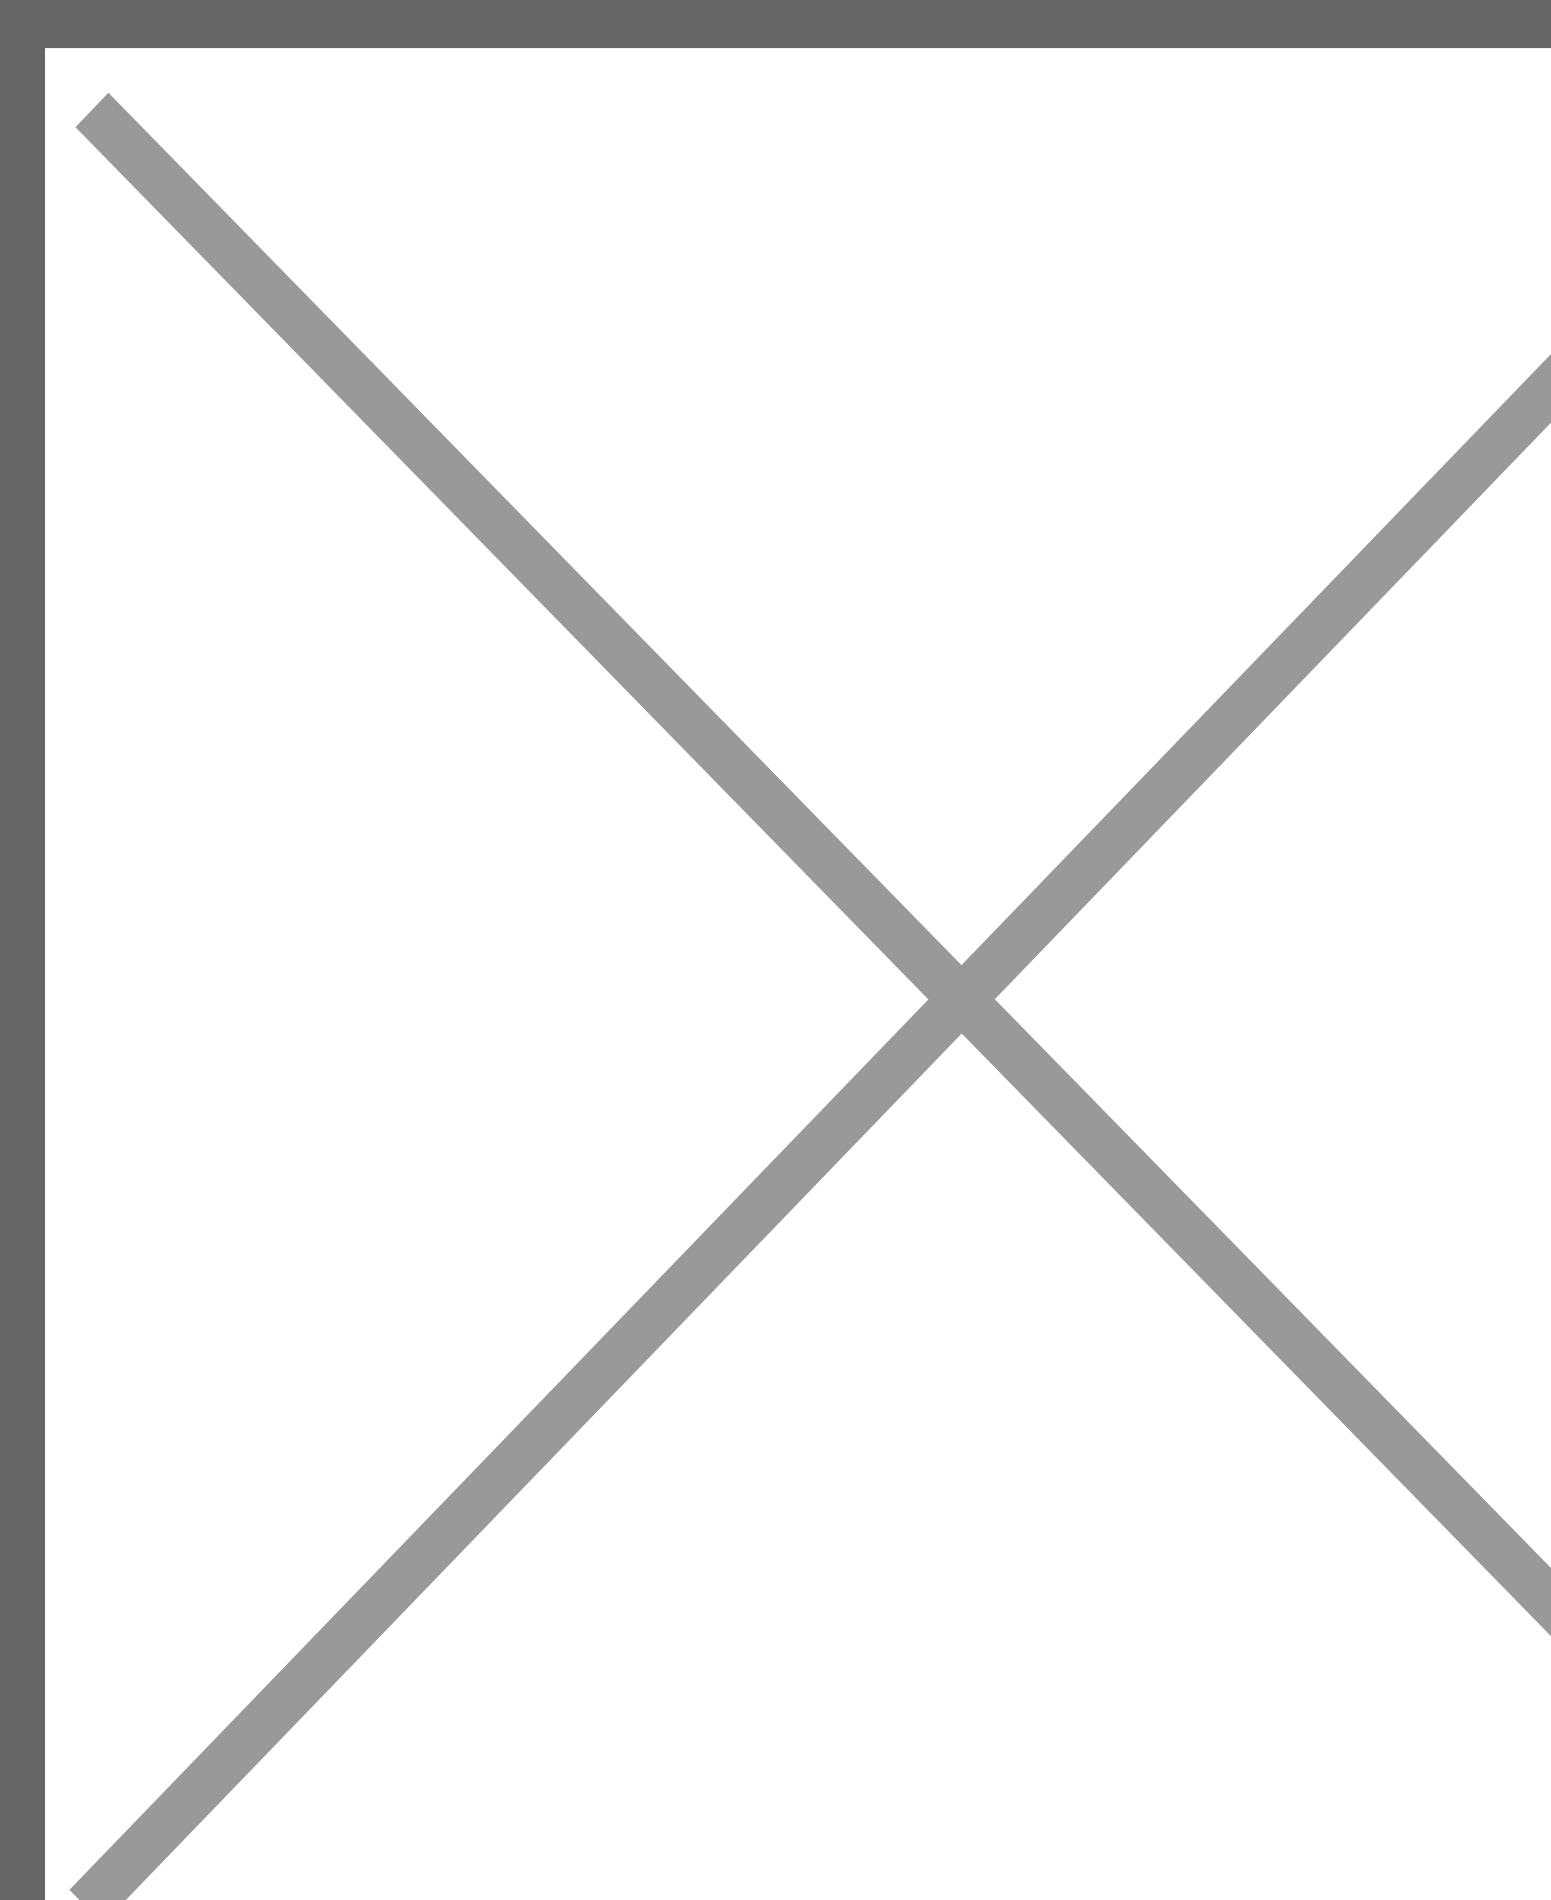

Image not found or type unknown

Global Multi Languages

Supports multiple specifications of power plugs, and more languages in the future. Let users all over the world enjoy the fun of 3D scanning.
